How to make sure your data submission was accepted and not rejected

After your data is submitted you should get confirmation that the data was received. To check and make sure the data was accepted and not rejected, run the Case Status Summary Report. This report is run from the HQR portal. To Run the Case Status Summary Report:

1. Log in to HQR via your HARP account.
2. Under the Dashboard on the left-hand side of the screen, select Data Results and Chart Abstracted.
3. Select the File Accuracy tab.
4. Under Program chose OQR (Outpatient Quality Reporting).
6. Under Encounter Quarter select the quarter for the data you have just submitted.
7. Click on Export CSV. Your report will appear in an Excel format showing the number of cases that made it to the warehouse for each measure submitted and the number accepted and/or rejected.

If your Case Status Summary Report shows that cases have been rejected, run the Submission Detail Report. This report will show you why your cases have been rejected. Correct the errors and resubmit those cases. Follow the above steps but select Submission Detail as your report.

If your Case Status Summary Report shows no data fits the criteria, then the data you submitted did not make it to the warehouse. Something must have gone wrong with your submission so try again.

Do not wait until right before the data due date to submit and check on your data. If you have rejected cases, you will want to have time to correct the errors and resubmit. Once the due date has passed, no further data will be accepted for the quarter.

OP-22 Data Submission

• Last year 74 CAHs submitted OP-22
• Check out the April issue of MBQIP Monthly for directions on submitting OP-22
• You can check to make sure your OP-22 measure data was accepted at this link:
HCP Measure Submission
