MBQIP Data Reporting Status

• Q4 2022: 75 CAHs reported on at least one measure
• Out of the 75 submitting:
  – 3 did not submit AMI (OP-2,OP-3) and ED-Throughput (OP-18)
  – 6 did not submit Healthcare Personnel (HCP) Influenza Vaccination
  – All 75 submitted OP-22
MBQIP Data Reporting Status

Q2 2023 EDTC – ALL 77 CAHs reported!!!

MBQIP Data Reporting Deadlines Coming up

- EDTC Q2 2023 due July 31st
- AMI and ED Throughput Q1 2023 due August 1st
  - AMI measures – continue to submit data through Q1 2023 encounters
How to make sure your data submission was accepted and not rejected

After your data is submitted you should get confirmation that the data was received. To check and make sure the data was accepted and not rejected, run the Case Status Summary Report. This report is run from the HQR portal. To Run the Case Status Summary Report:

1. Log in to HQR via your HARP account.
2. Under the Dashboard on the left-hand side of the screen, select Data Results and Chart Abstracted.
3. Select the File Accuracy tab.
4. Under Program chose OQR (Outpatient Quality Reporting).
6. Under Encounter Quarter select the quarter for the data you have just submitted.
7. Click on Export CSV. Your report will appear in an Excel format showing the number of cases that made it to the warehouse for each measure submitted and the number accepted and/or rejected.

If your Case Status Summary Report shows that cases have been rejected, run the Submission Detail Report. This report will show you why your cases have been rejected. Correct the errors and resubmit those cases. Follow the above steps but select Submission Detail as your report.

If your Case Status Summary Report shows no data fits the criteria, then the data you submitted did not make it to the warehouse. Something must have gone wrong with your submission so try again.

Do not wait until right before the data due date to submit and check on your data. If you have rejected cases, you will want to have time to correct the errors and resubmit. Once the due date has passed, no further data will be accepted for the quarter.

CMS Data Element Change

• **Starting with July 1, 2023 encounters**, the Centers for Medicare and Medicaid Services (CMS) measure data collection question is changing from “What was the patient’s sex on arrival?” to “What is the patient’s sexual orientation and/or gender identity?” The data element is being updated to be able to capture additional information to help evaluate health equity.

• Reference the Hospital Outpatient Quality Reporting Specifications Manual version 16.0a

• The new version of CART that contains the updated sex data elements that are effective July 1, 2023 has been delayed. Data for Q3 2023 should not be entered in CART until the new version is made available.
Quality Improvement Priorities

• What are priority topics everyone is working on?
