EDTC Actions/QI Tips

- Great work – EDTC composite score raised across the board!
- Continued opportunity: Goal is continuous improvement for all; benchmark is 100%
- Regularly review your CAH's EDTC data, with a focus on individual components where you may be scoring low
- QI Tips:
  - Education for staff to support understanding of the measure for documentation and accurate abstraction (both the *what* and the *why*)
  - Process improvement on individual components impacting your score – actions may include documentation reminders, education, pairing up with nursing leader to champion the work, making it easy for providers to document
  - Ensure that the receiving facility receives the information – shared EHR, fax, phone call if needed
- Reminder that nursing homes transfers are included in the measure – review performance by discharge disposition to identify if there are specific types of transfers where documentation of all data elements may be missing.
